## MembraneDrain - stainless steel edge rail subframe

Description	Part No.	Invert inches	Depth mm	Weight lbs.
Membrane subframe - stainless rail	96918	3.62	92	9.7
Clamping device stainless	96913	-	-	0.9

#### Notes:

- 1. Use KlassikDrain K100 grates
- 2. For channel refer to SlabDrain H100-8/H100-10

## **Specifications**

#### General

The surface drainage system shall be ACO Drain Membrane Drain complete with grates, as manufactured by ACO Polymer Products, Inc. or equal approved.

#### Materials

The trench system bodies shall be manufactured from polyester polymer concrete with minimum properties as follows:

Compressive strength: 14,000 psi Flexural strength: 4,000 psi Water absorption 0.07% Frost proof Salt proof

Dilute acid and alkali resistant

The nominal clear opening shall be 4.00" (100mm) with overall width of 6.85" (174mm) and a wall thickness of at least 0.50" (13mm). Each unit will feature a male to female interconnecting end profile. Stainless steel edge rail will be integrally cast in by the manufacturer to ensure maximum homogeneity between polymer concrete body and edge rail. Each edge rail shall be at least 1/8" (3mm) thick. Clamping device shall allow for membranes up to 0.50" (12.7mm) in thickness. Weep hole openings - 1.18" x 0.15" (30mm x 4mm) along the side allow liquids collected on membrane to drain into channel.

#### Channels & Grates

H100-8/H100-10 channel and grates should be specified. See seperate ACO Spec Info sheets for details.

#### Installation

The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.

#### Note:

Product for use only in areas above rooms not used for habitation or services. For advice in these applications please contact ACO for alternatives.
