

ACO Specification Information

### Specifications

#### General

The surface drainage system shall be ACO Drain Brickslot, as manufactured by ACO, Inc. or equal approved.

#### Materials

The Brickslot top is manufactured from 11 gauge stainless steel.

The nominal clear opening for Brickslot is 7/8" (22.35 mm) with two – 5/16" (8 mm) slot openings and with a 1/4" (6.35mm) bar between the two openings. Overall width is 9.37" (238 mm). For use with K200, KS200, SlabDrain (H200K-13, H200KS-13), and the K200 Series 900 catch basin. See separate ACO Spec info sheet for channel details. Brickslot rests in the grate seating of the channel, the anti-shunt lugs help prevent lateral movement and the weight of covering material keeps the unit secured. Access units have frames that fit catch basins with a separate unit that can be removed for maintenance.

#### Installation

The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.

# ACO DRAIN

## Type 673/674 Stainless Steel Heel Resistant Brickslot 200

One meter unit

Half meter unit

Description	Part No.	Overall Depth in. mm	Weight lbs.
